

ABOUT

Somerset OB/GYN Associates, an Axia Women's Health care center, is a women's healthcare medical practice located in Bridgewater, New Jersey. Somerset has offered obstetrics, gynecology, and breast health services for more than 30 years.

CHALLENGE

Somerset OB/GYN Associates had a mammography machine onsite for many years. However, the technologist who managed this service was retiring. Somerset needed to find a partner that could step in and manage their mammography service once the technologist left.

SOLUTION

At the recommendation of another practice, Somerset decided to partner with Onsite Women's Health, the leading provider of 3D mammography services embedded within innovative OB/GYN and primary care practices nationwide. Onsite provided the personnel to perform the services and to manage the mammography program.

"Onsite docs are so wonderful. They're very compassionate and nice, and they have never, ever said no."

JEANET HERNANDEZ,
Practice Manager, Somerset OB/GYN Associates

**Convenience Drives Compliance
and Compliance Saves Lives.**

RESULTS

In addition to mammography screening, Somerset also implemented additional services in partnership with Onsite, including screening breast ultrasound, diagnostic mammography and breast ultrasound, and bone density.

Now, when patients come for their annual appointments, they are able to complete any exams due prior to seeing the provider. This convenience for the patient has driven improved compliance.

- + Estimated to complete 4,200 annual exams
- + Mammograms are able to be completed the same day as the patient's regular provider appointment
- + Improved patient compliance with breast cancer screening protocol, with the site projected to exceed an 80% patient capture rate
- + Reports are typically available within 24 hours, which reduces delays in care
- + Weekly reports provide a timely overview of utilization information

Onsite provides Somerset with three rotating technicians, along with a coordinator who manages scheduling.

Jeanet Hernandez, practice manager at Somerset says, "Amy Moore, regional director with Onsite, is amazing. She always addresses any issues immediately." Jeanet credits Onsite with increased patient scheduling success.

By partnering with Onsite, Somerset providers and staff are able to remain focused on the delivery of quality patient care with a care process that includes 3D mammography.
