

ABOUT

Maternal Gynerations is an OB/GYN group located in Lawrenceville and Dacula, Georgia. The group has 11 providers: six OB/GYN physicians, one GYN-only provider, and four Women's Health Nurse Practitioners. The main facility in Lawrenceville has 33 exam rooms and two procedure rooms in addition to an entire imaging suite.

CHALLENGE

The mission of Maternal Gynerations is to provide healthcare for its community within the broad spectrum of women's health. As such, they wanted to bring in more services under one roof to make it easier for women to get the care they need without having to schedule multiple doctors' visits.

SOLUTION

Maternal Gynerations chose to partner with Onsite Women's Health, the leading provider of 3D mammography services embedded within innovative OB/GYN and Primary Care practices nationwide. Onsite provides the technology, personnel (radiologic technologists and administrative assistants), maintenance, and certifications – all at no additional cost to the practice. Onsite also delivers best in class project management, installation, and operational services, allowing providers and staff to remain focused on the delivery of quality patient care with a care process that includes 3D mammography.

**Convenience Drives Compliance
and Compliance Saves Lives.**

RESULTS

Maternal Gynerations is pleased with how well Onsite Women's Health mammography services have been received by their patients. "The patients love having the mammography services in the practice and the ability to get a same-day appointment," said Julie Ilgen, MBA, MHA, Administrator at Maternal Gynerations. She also emphasizes how their high-risk patients love how the services are tailored for them. "We do an Onsite risk assessment as well as offer genetic testing." Julie says patient education has been key.

Maternal Gynerations believes part of the practice's success is the way the Onsite team has become a part of the practice's team. "We've made it a top priority to integrate the Onsite team into our practice's team to promote success and morale," said Julie. That includes things like daily operations meetings and staff lunches. "We've experienced great success with this." She adds that the Onsite radiologists and technologists "have been great."

**With Onsite, Maternal Gynerations
performs 25 mammograms a day,
5 days a week.**

"The Onsite team is very professional to work with and is very responsive. They have been fantastic."

JULIE ILGEN,
MBA, MHA, Administrator at Maternal Gynerations.
